

## Educational visits

We often use a particular educational visit to enhance the children's learning. These visits are carefully selected to help enrich our curriculum offer. We feel they help to make the learning experience for our children more memorable. Allowing them to immerse themselves in topics fully. The visits are organised to fit with our three-year rolling program and may be chosen to deepen knowledge and skills from a variety of subject areas. They include short local visits within the local community as well as whole day opportunities. For example visits to The Stafford High House, community litter picks, forest school activities at Edgmond Hall, food tasting at Harper University, Cosford , Enginuity, visits to our local church St Andrews with which we have close links.
